

Asphalt Mixtures Performance Testing 101

Date: May 10, 2022

Time: 8:30 am – 10:45 am

Location: Kingswood Lodge

*Cost: Free for students and those
attending the NBUPG Annual
Seminar*

Workshop Overview

The evaluation of asphalt mixtures has traditionally relied on the volumetric parameters however, it is possible to test directly the mixture for estimating the long-term performance. Performance testing allows evaluating the asphalt mixture through standard test methods and measure the response of the material under simulated conditions of loading and environmental demands. This workshop will introduce the different tests available and its application.

Agenda

8:30 am – Coffee and sweets

9:00 am – Workshop

10:30 am – Questions and Discussion
